Ph: 8387 1500   www.footscray.vic.edu.au
BUILDING PROJECT 1  
FCC SUSTAINABILITY CENTRE

This environmentally sustainable designed centre includes a science classroom with environmental monitoring systems, computer controlled glasshouse, potting booths, hydroponic system, shade house and propagation house – all set in a lush and tranquil garden setting.

The centre is purposely designed and equipped for students to:
- Study environmental science Years 7 to 12
- Undertake environmental and sustainability projects
- Monitor and measure all main energy features of the centre
- Develop knowledge and skills for organic, urban gardening
- Study VCE/VET Horticulture
- Study VCE Environmental Science

BUILDING PROJECT 2  
SCI-TECH CENTRE

This cutting edge Centre is purposely designed and equipped with a large flexible classroom supported by sophisticated technology for higher level science and technology programs.

It will be equipped for students to undertake studies in:
- Physics
- Robotics and electronics
- VCE/VET Avionics and Sustainable Technologies
- VCE Systems - Engineering
