Love physics? There are many amazing occupations suited to students who love physics. The following are two examples:

- **Radiation Oncology Medical Physicists**: are highly specialised professionals “who create, implement and monitor the procedures which allow the best treatment using radiation, taking into account the protection and safety of patients and others involved in the treatment process. In their role, they are consulted by radiation oncologists and radiation therapists to provide advice as to the best use of medical radiation for treatment”. For information about education requirements, a job description, salary and working conditions, go to [http://tinyurl.com/l32v8hs](http://tinyurl.com/l32v8hs)

- **Geophysicists**: study the structure and composition of zones below the surface of the earth by taking measurements using seismic, gravity, magnetic and electrical data collection methods. Geophysicists can spend their time outdoors using advanced technologies to study features of the earth, and spend time indoors using computing technology to develop and analyse mapping, calculations and modeling. Many Geophysicists find work in the mining and petroleum industries. For more information, go to [http://tinyurl.com/kkn7cee](http://tinyurl.com/kkn7cee)

Science news: Be inspired by the latest stories featured on RiAUS – Australia’s Science Channel. Some of the topics covered this week include:
